Hi! I'm Ken Hoff.

ken@hoff.tech - **https://hoff.tech** - **(303) 882-6490** - **Greeley, CO**

I'm an experienced full-stack Typescript independent contributor and team lead.

I've been building web apps professionally for 10+ years. I'm looking for a **happy, hungry, and humble team** to have a long-term impact with.

Competencies

- **Full-stack TypeScript**
- **API Design** - REST, GraphQL and RPC
- **Building frontend UI libraries and design systems** - styled-components, Storybook, Figma
- **Performance profiling** - React, browser, and server-side, Lighthouse and FPS metrics, Chromium debugging
- **Testing, frontend and backend, unit and end-to-end** - Cypress, Jest, Istanbul, react-testing-library, jsdom
- **Relational and nonrelational databases** - PostgreSQL, MongoDB
- **Frontend code bundlers** - webpack, vite, create-react-app
- **Cloud providers** - Google Cloud, Azure, AWS
- **Source control** - GitHub, Bitbucket
- **"Alternative" app backends** - Serverless / lambda functions, Firebase
- **Build and deploy pipelines** - GitHub Actions, Docker, AWS CodeBuild
- **Code quality** - ESLint, Prettier, TypeScript

In my free time, I like working on the house with my partner Rachel and taking our little dog Alfie for walks. Ask me what we've got growing in the garden this year!
